Project Update—Troxler Widening

Construction on the Troxler Avenue Widening Project began the week of February 18. To date the contractor, Petroff Trucking of Collinsville, has completed all storm sewer on the south side of Troxler by installing approximately 2400 linear feet of storm sewer setting 26 drainage structures.

On Thursday the contractor removed the shoulder on the north side of the road in preparation for curbing and the remainder of the storm sewer. The milling machine pictured here is removing old surface. What is removed will be reincorporated back into the project as a base filler for the new, wider pavement.

Besides the new storm sewer, and the construction of the additional turn lane down the entire stretch of roadway from Route 160 to Route 140 /143, to give the residents of Augusta Estates as well as the traffic for the hospital, the project will include curb and gutters along Troxler Avenue. A multi-use path, similar to the path along Frank Watson Parkway, will be constructed on the south side of Troxler Avenue along the front of the hospital property to the corner of Troxler Avenue and Route 160, then will turn south and run along the west side of Route 160 along the hospital property. This path will eventually run along the entire south side of Troxler Avenue to Route 40 /143.

The contract is approximately 20% complete at this time and will be finished by June 14th.
